

**WEDNESDAY 16 AUGUST | HMRI PUBLIC SEMINAR**

# Immunotherapy and other drugs: A future of **cancer treatment**

**What does the future hold in cancer treatment? What new drugs are on the way? Can we really using the body's own immune system to kill cancer?**

The HMRI National Science Week **Cancer Public Seminar** will explore these questions and showcase the innovative cancer research happening in the Hunter.

**Dr Craig Gedye** | Cancer immune therapy – we've made it to basecamp, now let's reach for the summit

**Dr Nikola Bowden** | Finding a new use for old chemotherapy drugs: 'kickstarting' an immune system attack on tumours

**Dr Anoop Enjeti** | Different baits for different crabs – personalizing therapy for acute leukemia

**WHEN:** Wednesday 16th August 2017, 5.30-7.00pm  
**WHERE:** HMRI Building  
Kookaburra Circuit, New Lambton Heights (John Hunter Hospital)  
**COST:** FREE
