

**Wednesday 21st September 2016**

# HMRI SEMINAR SERIES

## **Professor Francesco Chiappelli** **‘The Theory and Practice of** **Comparative Effectiveness Research’**

The September HMRI Seminar Series features internationally recognised expert in comparative effectiveness research, **Professor Francesco Chiappelli**.

Professor Chiappelli’s work investigates how we can truly obtain the “best available” evidence, how to obtain reliable assessments and analyses of it, how to best disseminate this information, and how we integrate this into evidence-based clinical decision-making.

Comparative effectiveness research is a process that results in improved patient outcomes, enhanced research planning, better products, and novel evidence-based policy development.

**WHEN:** Wednesday 21st September, 11:30am-12:30pm (lunch to follow)

**WHERE:** HMRI Caves Lecture Theatre, HMRI Building New Lambton Heights

**Videoconferencing is available for this session.**

Please email [HNELHD-RSDO@hnehealth.nsw.gov.au](mailto:HNELHD-RSDO@hnehealth.nsw.gov.au) to register your interest.

*The HMRI Seminar Series is a free event to encourage collaboration, education and access to international research leaders. All researchers are welcome and encouraged to attend.*
